Capacity strengthening and dialogue

**AKADEMIYA2063 – PAFO and member
organizations meeting
Oct. 18, 2024**

Julie Collins

Senior Associate Scientist,
AKADEMIYA2063

Ideas for dialogue and capacity strengthening

- Policy dialogues / training to share analytical outputs
 - Nutrient adequacy and community vulnerability platforms
 - Customized AAgWa platform: Crop mapping, yield forecasts, climate anomalies, etc.
- Deciphering machine learning crop map outputs
- Data intelligence for precision farming
 - Enhance farmers' ability to use agricultural data to inform decision making
- Map literacy training

Training on gender issues for the DERPin team - and potentially other partners

- Unpacking basic gender and gender mainstreaming concepts and implications in DERPin
- Gender approaches in food systems
- Gender lens in the analysis of data and generation of insights for policy influencing
- Strategies for mainstreaming gender within the DERPin project

Targets to meet:

- Platforms:
 - **500 actors are informed** about web-based platforms
 - **250 actors confirm use** of platforms in political decisionmaking
 - **200 actors take needs of women into account** in more differentiated way
- Capacity strengthening:
 - **700 smallholder farmers confirm new competencies** to use data
 - **400 actors confirm new competencies** for shaping strategies
- Policy dialogues:
 - **500 actors actively participated** in inclusive dialogue platforms
 - **175 (policymaker) actors confirm positive contribution** of dialogues

Gender target: 50% of people reached should be women

We would like your feedback on:

- From these ideas and the analytical outputs presented today, what is of most interest to farmer organizations and their members?
- What content should we envision for capacity strengthening targeted to farmers?
- What format should be used for capacity strengthening targeted to farmers?
- What content should we envision for policy dialogues?
- How can we best reach our targets for capacity strengthening and policy dialogues?
